

METABOLOMIC AND BIOANALYSIS RATES 22-23* (Excluding VAT)

Technique	Collaborating group ¹ (€)	Service ² (€)	Observations
Non-target analysis with LC-QTOF-MS	120	240	The result to be delivered is the raw data obtained
Non-target analysis with GC-QTOF-MS	120	240	The result to be delivered is the raw data obtained
Non-target analysis with GC-Q-MS	100	200	The result to be delivered is the raw data obtained
Non-target analysis with CE-TOF-MS	120	240	The result to be delivered is the raw data obtained
Target analysis GC-MS	60	120	
Target analysis with LC-QQQ-MS (standards not included)	60	120	The result to be delivered is the quantification of the analyte
Sample treatment		44 €/hour	
Data processing		60 €/hour	
Development and/or adaptation of analytical method with LC-QQQ-MS or GC-QTOF-MS	19800€	30600€	

¹ A collaborating group is the one with which the research is shared and therefore the results of it and the scientific productivity are also shared.

² It is considered a service when the person proposing the study is the exclusive owner of the results

³ VAT will be added when it corresponds

*Consult special prices for a large number of samples or exceptional collaborations
